

openPicus Flyport

Programmable modules for IoT

Who we are

Self-funded company (2013)

5.000 customers around the world

We do hardware design and manufacturing

We make Flyport modules and IoT Kits

Flyport modules

Programmable and Cloud connected: **all in one**

3 versions, same pinout: **Wi-Fi, GPRS, LAN**

Ideal for IoT: **Low power** and **RealTime**

open **PICUS**

IoT Kits

Ready to use kit
with a >80 devices
(sensors/actuators)

Make your Prototype in 2 minutes, plug and code

It's like an ARDUINO?

NO it's not!

Arduino is just for prototyping

Flyport is great for prototyping but then you can create end-user products with it!

Flyport is as powerful as an Arduino Yun but costs 35€ vs 70€

Open hardware and made in Italy

D-LINK DCS-5635

Solar Energy meter (GPRS)

Smart Drop by Evian

Xmas Social Tree at FCO

NEXT, WE NEED INVESTOR

Disruptive Cloud-based wireless sensors and actuators for self-installation

Target Market: DIY and software companies.
No firmware dev, APIs provided

Atomic home automation, IoT made easy

We are looking for 500k€ for R&D and Go To Market

WHY YOU SHOULD INVEST?

Team has demonstrated its skills

We have traction and visibility on this market

We have a working prototype

IoT and Smart home automation is a market
Worth 20B\$ in 2017
